

Unlimited Compliant Solutions

ProAct is the go-to choice for customers seeking the most innovative industrial air and water treatment solutions.

Pipeline Hydrostatic Test Water Treatment

ProAct Services Corporation is a national leader in the on-site treatment of contaminated water. ProAct has successfully treated water in all 50 states, Canada, Mexico, and South America.

We pride ourselves on being the best hydrostatic test water treatment contractor in the country. With over 20 years of experience, we are the best in filtering hydrostatic test water at the same rate required for the dewatering pigs. We specialize in developing mobile water treatment systems with flow rates to meet our client requirements.

Water treatment capabilities include Hydrocarbons, Suspended Solids, Chlorine, Tracer Dyes, Metals, PCB's and more.

ProAct Services Corporation customizes each treatment system for the specific contaminants, general water quality, discharge permit limits, water volume and flow rate requirements of each project. Treatment techniques include:

Solids Filtration utilizing

- Geo-tubes
- Bag filtration
- Sand filtration

Organics and Metals adsorption utilizing mixed media beds

- Organo-Clay
- Activated Carbon
- Impregnated Zeolite

Chemical Injection for pH adjustment and Polymer addition.

Need vapor control on that pipeline? ProAct Services offers mobile flare services as well!

ProAct Services Corporation's turn-key services include equipment delivery and set-up, media loading and extraction, system operation, media disposal, discharge monitoring and final project reporting.

Some Treatment Systems

Air Sparge

Carbon Adsorption Systems (Cas)

Electrical / Gas Fired Thermal Catalytic Oxidation

Groundwater Remediation Systems

In-situ Ozone Remediation Systems

Internal Combustion Engine Systems (I.c.e)

Multi-phase Extraction Systems (Mpe) / Dual-phase Extraction (Dpe)

Oil / Water Separators

Scrubber Systems

Soil Vapor Extraction (Sve)

Suspended Solids Removal Systems
